

Well Commander Series

PUMP OFF CONTROLLER Variable Frequency Drive Package

Maximizing Production, Lowering Costs

At Henry Pump we understand the oil and gas industry.

We deliver innovative products that provide producers with powerful well monitoring capabilities resulting in significant cost savings.

Our Variable Drive Frequency POC is easy to deploy, offers a simple, powerful data interface, and provides the most comprehensive well monitoring capabilities in the industry.

Pump Off Controller Variable Frequency Drive Package

Easy to deploy

Simple interface, powerful analytics

Solid equipment protection

Incredibly accurate speed or torque control

Pump Off Controller Variable Frequency Drive Package

Robust Software

DATA STORAGE

- POConsole® allows storage of every card for up to 40 days
- Unlimited energy and production storage

DATA ANALYSIS

- Surface and downhole cards are drawn simultaneously in real-time
- View Real-position of well head
- Real-time view of energy and production totals and predictions

DATA ACCESS

- Secure WiFi connectivity on location
- 10-inch color touch-screen display with simple, intuitive interface
- Optional cellular or satellite modems

REMOTE MONITORING

- Access data from any web browser
- Unlimited users
- No licensing restrictions

Expert Customer Service

SAME DAY RESPONSE

- Our customer service team is on call 24/7 - we'll never leave you in a bind
- We respond to all issues within 24 hours - no exceptions

EXPERIENCED EXPERTS

- Our team has over 70 years of combined industry experience
- Our team members are proven experts with extensive backgrounds in engineering, field service, customer applications, and product development

Dependable Hardware

ALL-IN-ONE NEMA 4 ENCLOSURE

- All POC and power components are housed in single enclosure
- Proven protection from weather and elements

NO PROPRIETARY COMPONENTS

- System uses off-the-shelf Allen Bradley Hardware
- Built on an all-Ethernet Platform
- Spare digital and analog inputs allow for operator expandability

EASY TO DEPLOY

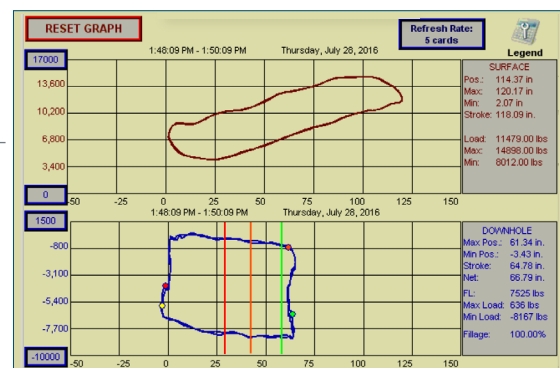

- Low installation cost
- All terminal blocks are pre-wired and color coded for simple installation

Preventing one equipment failure covers the cost of deploying Henry Pump's Variable Frequency Drive POC.

REAL-TIME DATA | REAL-TIME CONTROL

Our patent pending technology displays "Real-Time", simultaneous drawing of surface, and downhole cards providing producers an accurate, reliable display of current well conditions.

Easy to Deploy | Simple Interface | Powerful Analytics
