

Maximizing Production, Lowering Costs

At Henry Pump we understand data.

We deliver innovative products that provide powerful monitoring capabilities that result in significant cost savings.

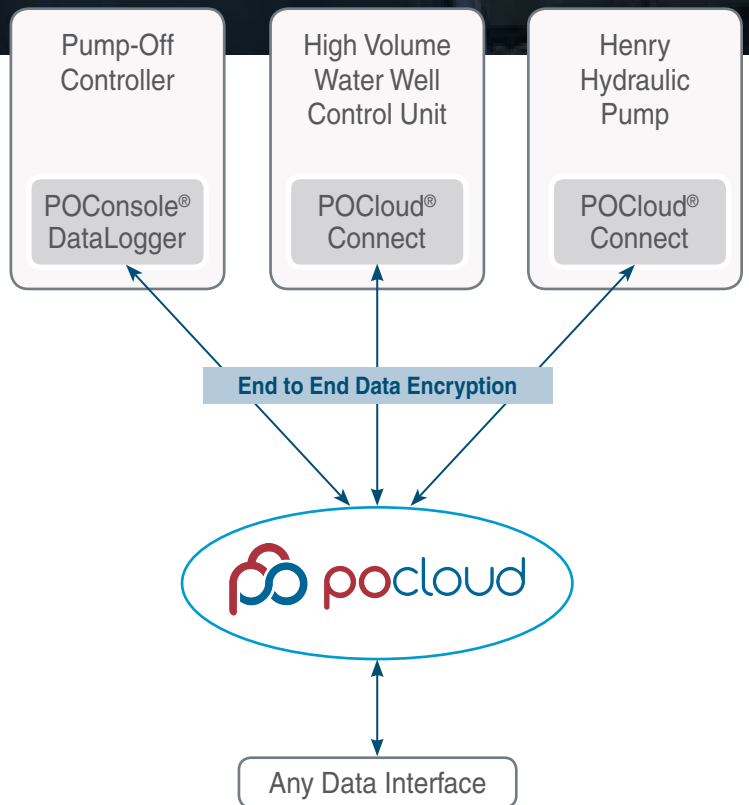

Our remote monitoring systems allow real-time analysis on any web-enabled device, on-site or remotely. The system provides powerful analytics, reports and notifications.

POCloud® & Cloud Connect

End-to-end data encryption provides security and peace-of-mind

Configurable reports and status notifications

Detect and protect against problems before they occur

POCloud® & Cloud Connect

POConsole® DataLogger

SECURE ON-SITE ACCESS

- POConsole® provides access to well data while at the well site via a secure WiFi network
- Accessible from any device that has WiFi capability and a web browser such as a laptop, smart phone or tablet

DATA ANALYSIS

- Analyze data in a easy-to-use web interface
- View the well's cards, gauge-off data, well test data, and event logs
- System is capable of monitoring any device with a data interface

DATA STORAGE

- Store time-series data from POCs, PLCs, sensors, and APIs
- Data aggregation allows for powerful analytics of all wells as an oilfield
- Ability to push data to POCloud® or SCADA

Cloud Connect

SECURE DATA TRANSFER

- Enables real-time secure data transfer with end-to-end encryption and HTTPS
- Connects to POConsole® or PLC to allow remote management of data through a single interface
- Built-in cellular modem with satellite option available

MULTIPLE INPUTS AND OUTPUTS

- Digital and analog inputs and outputs, serial ports, along with the support of many communications protocols, allows the system to read data from almost any device
- Onboard ethernet and wireless access point
- Connects directly to POCloud®

POCloud® Remote Monitoring

SECURE REMOTE DATA ACCESS

- Our unique cloud-based service allows real-time data visibility on any web-enabled device whether on-site or from a remote location
- All data is encrypted using the secure HTTPS protocol
- Monitor wells, tank levels, pump panels, and more from any device with a web browser, no software to install

ALERTS & REPORTING

- Remote alerts signals users through text messages or emails of potential problems or status changes
- Daily reports update engineers with pertinent information

DATA ANALYSIS

- Easy to interpret graphs, charts, and visualizations of data
- Track all assets in map or list view
- Advanced analytics and data roll-ups

COST EFFECTIVE

- Per-device subscription pricing
- No user limitations

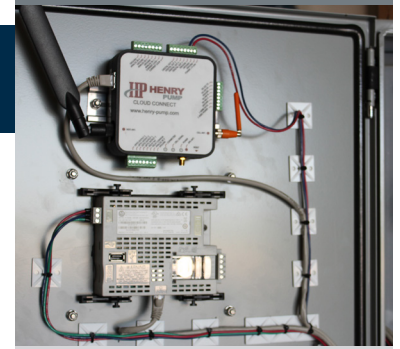

Expert Customer Service

SAME DAY RESPONSE

- Our customer service team is on call 24/7 - we'll never leave you in a bind
- We respond to all issues within 24 hours - no exceptions

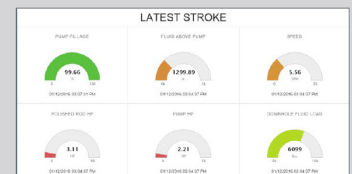

EXPERIENCED PROFESSIONALS

- Our team has over 70 years of combined industry experience
- Our team members are proven experts with extensive backgrounds in engineering, field service, customer applications, and product development

Powerful Remote Monitoring

Simple Data Indicators Combine to Create Easy To Read Dashboards

CUSTOM DATA COLLECTION SOLUTIONS

Henry Pump provides custom data collection solutions for monitoring tank batteries, overload relays, or nearly any other device. Contact us for more information.

Easy to Deploy | Simple Interface | Powerful Analytics
